> Early in the project, I met with some citizens and students from TSU and Professor Earthea Nance. The professor was very helpful with the community. She emailed me after our meeting and indicated that the odors off the site were significant.

>

> I also encountered the professor at the first public meeting where she made the suggestion that we provide several citizens with Multiraes for them to record air monitoring information. I told her I would check and I was told we had no funding to provide the equipment. We have been doing roving monitoring while doing our operation. We tried the Viper System but it did not function properly. One of the reasons is our system was not updated and EPA would not pay for the air cards necessary.

>

> Anyway, I believe our air monitoring was sufficient. The odors are being reduced as waste is disposed. We do have occasional odors from our ops and with my relationship with the residents, I here from them if we have an issue.

>

> Therefore, I suppose we have somewhat coordinated with TSU albeit not directly with Dr Bulliard.
